

Dr. Eva de Mol

VU University Amsterdam

Eva is a scientist and an investor. She worked on her PhD in economics at the VU University and University of California - Berkeley Haas Business School.

Her research focusses specifically on entrepreneurship and teams - she collected data of 800+ entrepreneurs to discover patterns of the most successful teams. Eva's work is published in top tier scientific journals and she's also a frequent writer for Harvard Business Review.

While living in Silicon Valley, Eva started her own company, an algorithm-based tool to evaluate entrepreneurial teams. Being one of the few investors to truly apply a human capital perspective into investing, Eva is seen as a changemaker in the investment industry.

Eva is a strong advocate of diversity in tech and engages in several initiatives to get more female entrepreneurs funded.
